Anderson Kaiti

Full-Stack Web Developer

ABOUT ME

Full-Stack Developer focused on modern web applications within the JavaScript ecosystem (React, Next.js, and Node.js). With a solid academic foundation in Computer Science and experience in social impact and research projects, I have expertise ranging from requirements gathering to deployment on Cloud environments (AWS, Azure, and Vercel). Specialized in building responsive interfaces and scalable APIs, applying best coding practices such as SOLID principles and automated testing.

EXPERIENCES

IT Intern – Funprev Bauru (Nov 2024 – Nov 2025)

Provided support and maintenance for internal systems, focusing on service stability and continuity. Diagnosed and resolved incidents in network environments and workstations, assisted in basic infrastructure administration, performed and validated backup routines, and offered technical support to users. Participated in the installation, configuration, and updating of software, hardware, and network devices, contributing to process standardization and system reliability improvements.

RESEARCH EXPERIENCE

Contributor – "HPV 360º" Project
UNISAGRADO

2024-2025 — Developed a mobile application for research, prevention, and awareness of HPV, in collaboration with Nursing researchers.

TECHNICAL STACK

Front-end	React, Next.js, TypeScript, Tailwind, React Hook Form, Zod, React Query, Shadcn, Cypress
Back-end	Node.js, Express, Fastify, Swagger, Prisma, Drizzle
Banco de dados	MySQL, MongoDB, PostgreSQL
Cloud	Vercel, Azure, AWS, Firebase, Serverless Framework
DevOps	Git, Docker

EXTENSION PROJECTS

UNISAGRADO

2023	Web platform for pet adoption using React and Firebase, enabling registration, filtering, and contact between adopters and NGOs
2024	Informative web platform focused on dengue awareness, covering prevention, risks, and access to health information
2024	Institutional website for the Bauru Teachers' Union (SINPROBAU), with authentication, content management, and document handling
2025	Institutional website for the International Network of Researchers on Indigenous Peoples and Traditional Communities (RedeCT), focused on scientific dissemination and academic networking

COURSES & CERTIFICATIONS

2023	**HTML5 e CSS3** Fundamentals of semantic structure, CSS styling, and layout best practices
2023	**Java Basics & Object-Oriented Programming** Core Java concepts and object-oriented programming principles

EDUCATION

2022-2025 **Bachelor's Degree**
Computer Science,
UNISAGRADO

IDIOMAS

Inglês **Pre-Advanced**
currently in 4rd year
of CNA English
course

2023 **MySQL**

Relational database modeling and
management with SQL

2023 **JavaScript**

Language fundamentals, programming
logic, and DOM manipulation

2023 **Creating APIs with Node.js | balta.io**

REST API development with Node.js and
MongoDB

2023 **React with TypeScript, Hooks, and
Context | balta.io**

Building an app with React, TypeScript,
Hooks, Context, and Forms

2024 **React Native**

Mobile development fundamentals with
React Native

2025 **Next.js 15**

Web applications development with Next.js
and App Router

2025 **React Query**

Asynchronous state management and API
consumption in React

2025 **SaaS Bootcamp – Scheduling Platform
for Clinics**

SaaS development focused on
authentication and scheduling

2025 **NLW Agents – Advanced**

Full-stack application with Node.js, React,
PostgreSQL, Docker, and AI integration.

2025 **Diet Control App**

Mobile application with React Native,
Serverless architecture, AWS, and OpenAI
integration

2025 **Creating SaaS with Next.js and RBAC**

SaaS applications with Next.js and role-
based access control

2025 **Next Next.js App Router & Testing**

Using Next.js App Router and automated
testing with Cypress

2025 **Full-Stack Challenge with AI**

Full-stack application with Node.js, React,
and AI integration
